

WELCOME TO NOKIA TOKEN MANAGEMENT SYSTEM

Steps For The minimum Hardware Requirement at the Nokia Care Centre.

For 16000/- cost machine .

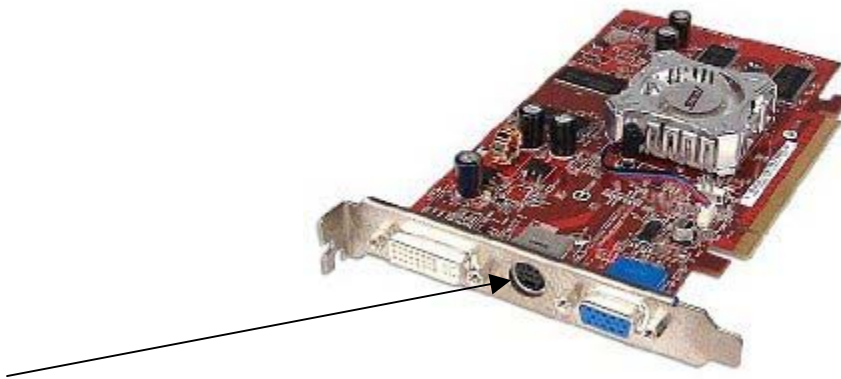

- **One** computer with **Dual Display (PCI Express Card)** Property for Token Display.
- One computer with one serial and one parallel port for Token Machine.

For 26000/- cost machine .

- **Two** computer with **Dual Display (PCI Express Card)** Property for Token Display and one for Token Machine.
- One computer with one serial and one parallel port for Token Machine.

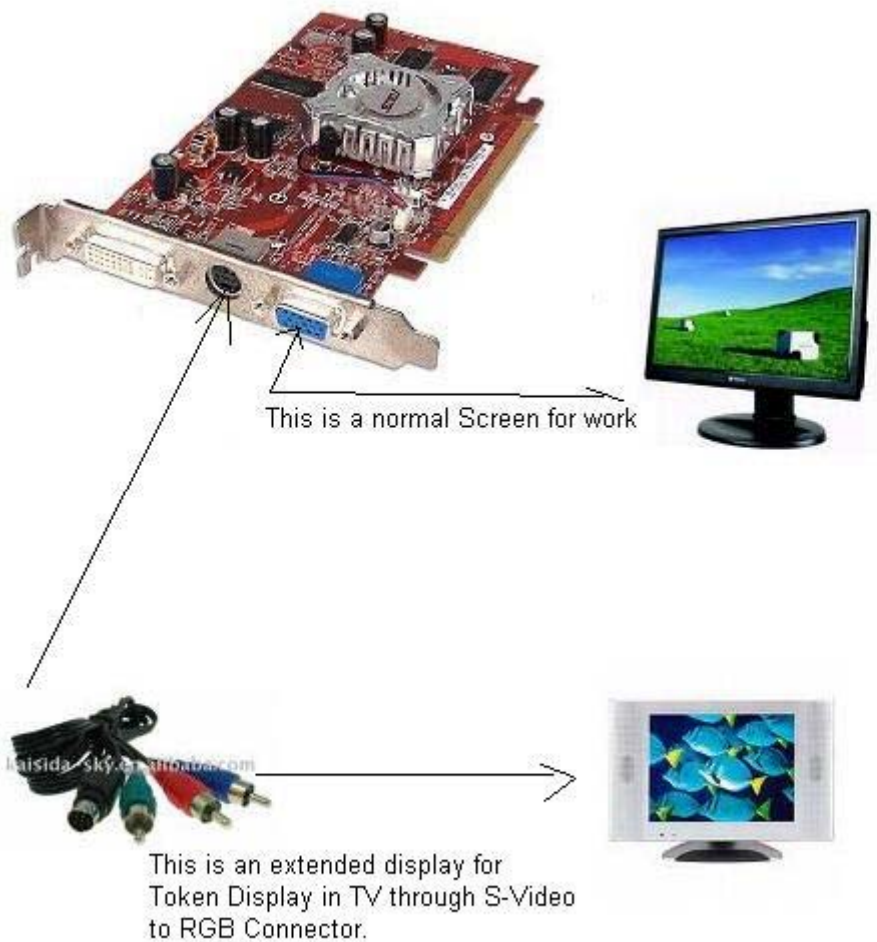

Dual Display Property

for dual display property one should have a PCI Express Card installed in one of his computer which look like this.

The card will have one VGA output , One S-video Output and One DVI Output

If the customer want TV to be his second monitor then he can connect the display in the below mentioned way.

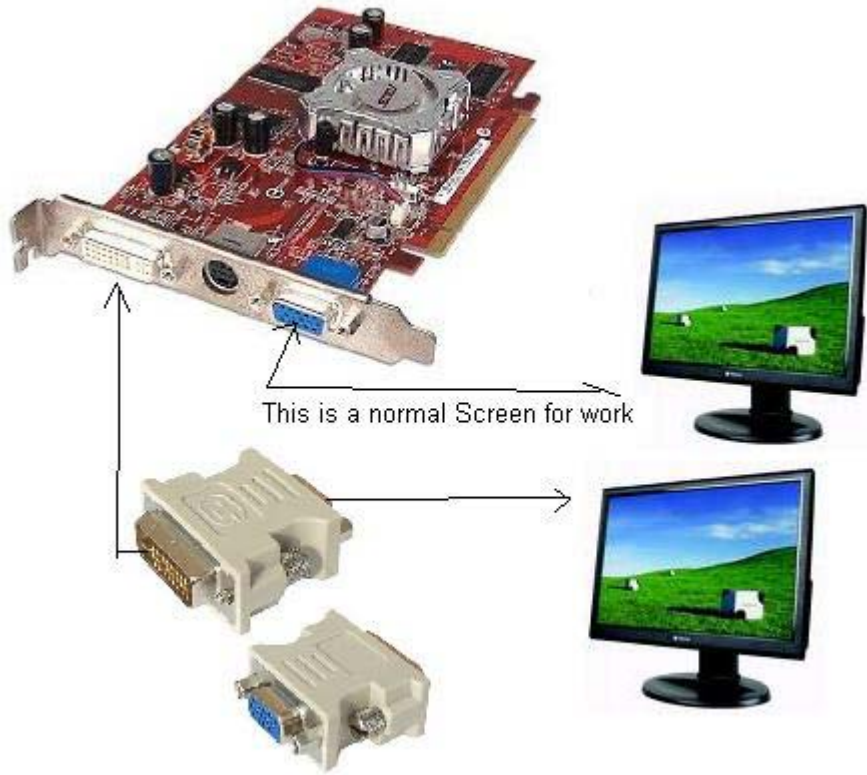

For connecting TV one must have a S-Video to RGB converter which look like this..

This is an S-Video to RGB convertor for TV Display. This is easily available in the market.

If the customer want to connect Display as LCD or Normal monitor then he can have as follows

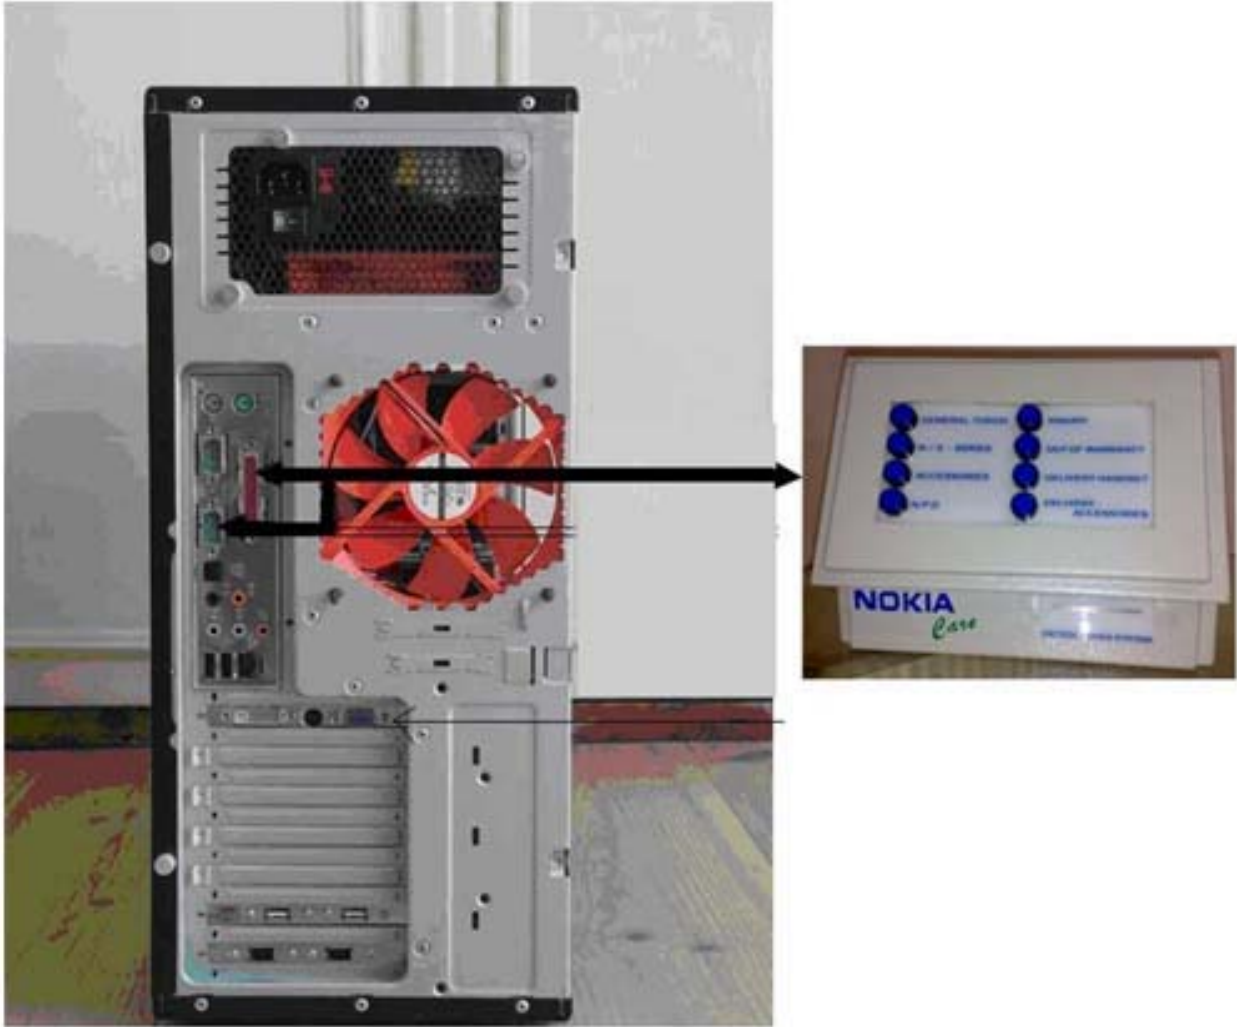

Summary of the hardware requirement.

This is a Parallel Port and serial port where One can connect the Token Machine.

This is the Pci express card for dual monitoring for token Display.

This is how token machine is connected with your computer system.

Thanks for Being with us.
